Kite Ursus 8x32, 8x42, 10x42 & 10x50

URSUS is the entry model of the KITE OPTICS professional roof prism range. It is an easy to use all-round pair of binoculars, designed for every day use and comes with an extensive 30 years warranty. The optical system benefits from the KITE MHR coating. A coating system that provides full multi coating on all lens surfaces, as well as a high reflective coating on the prism. This results in excellent colour balance, a bright and sharp image. The KITE URSUS is fully waterproof and nitrogen gas filled, eliminating any chance of condensation from the inside. Its chassis is fully covererd with a strong rubber armor to give the instrument optimal protection against shocks and jolts.

Description

COMFORT DESIGN
The soft-touch rubber armor is designed to provide maximum grip on the right places. The instrument is ultra light and well balanced, making it very comfortable to hold, to handle and to carry with you all day. The short hinge design allows your fingers to wrap around the barrel, and use the instrument with one hand only.

DURABLE EYECUPS
The Ursus is equipped with 4-stage metal eyecups, for optimized viewing comfort with or without spectacles. The metal eyecups are covered with soft rubber and are self-removable.

LARGE RIB FOCUS WHEEL

The focus wheel features thick ribs, that will give you best grip at all times even with gloves.
the wheel turns smoothly for fast and accurate focusing from closeby to infinity.
