Description

Designed for comfort and practicality, the Outrek 8x42 is the mid-field model in the range. Sturdily-built and shrouded in high-protection rubber armour, it features textured areas on the outer edges of the body to increase grip and to make holding easier.

Comfortable, rubber-covered eyecups twist out to click-lock in three extended positions, all of which deliver the full field of view at maximum extension.

A stippled focussing wheel ensures non-slip finger contact while adjusting the binocular's focus.

The 8x42 delivers a nicely bright image, which is sharp with natural colours, this model featuring BaK4 prisms, fully multicoated lenses and a gas-filled body, rendering it waterproof.

Carrying a 5-year warranty, it is supplied with a lens cloth, soft protective carry case, neoprene neck strap, an articulated rainguard and stay-on rubber lens covers.

Features

Image
