### Description

Taking a step up from the Outrek binoculars, with its higher magnification, the Trailbird 10x42 is one of two models in this range which offers the user a little extra reach. Sharing the solidarity and sturdiness of the Outrek, this binocular is shrouded in high-protection rubber armour and it features furrowed and stippled textured areas on the outer edges of the body to increase grip and to make holding easier.

Comfortable, rubber-covered eyecups twist out to click-stop in two extended positions, which deliver the full field of view at their maximum extension.

A stippled focussing wheel ensures non-slip finger contact, turning smoothly and positively while adjusting the binocular's focus.

The 10x42 delivers a crisp, bright image, which is sharp with natural colours, this model featuring BaK4 prisms with phase-corrected coatings, fully multicoated lenses and a gas-filled body, rendering it waterproof.

Carrying a 5-year warranty, it is supplied with a lens cloth, soft protective carry case, neoprene neck strap, an articulated rainguard, and stay-on rubber lens covers.

### Features

#### Image

Completely waterproof to a depth of 1m for 30 minutes

Nitrogen purged & O-Ring sealed to prevent internal fogging

Premium BaK4 glass prisms produce clearer sharper images

Fully multi-coated optics for greater clarity & brightness

Phase correction coating enhances resolution & contrast

Dioptre adjustment to ensure both eyes are correctly focused

Twist-up eye cups with position stops for eye relief

Tripod adaptable (adaptor sold separately)

Durable rubber armour withstands the highest level of impact

Binoculars include a 5-year warranty
