### Description

Taking a step up from the Outrek binoculars, the Trailbird 8x42 is the most popular model in this range. Sharing the solidity and sturdiness of the Outrek, this binocular is shrouded in high-protection rubber armour and it features furrowed and stippled textured areas on the outer edges of the body to increase grip and to make holding easier.

Comfortable, rubber-covered eyecups twist out to click-stop in two extended positions, which deliver the full field of view at their maximum extension.

A stippled focussing wheel ensures non-slip finger contact, turning smoothly and positively while adjusting the binocular's focus.

The 8x42 delivers a crisp, bright image, which is sharp with natural colours, this model featuring BaK4 prisms with phase-corrected coatings, fully multicoated lenses and a gas-filled body, rendering it waterproof.

Carrying a 5-year warranty, it is supplied with a lens cloth, soft protective carry case, neoprene neck strap, an articulated rainguard and stay-on rubber lens covers.

### Features

#### Image

Completely waterproof to a depth of 1m for 30 minutes

Nitrogen purged & O-Ring sealed to prevent internal fogging

Premium BaK4 glass prisms produce clearer sharper images

Fully multi-coated optics for greater clarity & brightness

Phase correction coating enhances resolution & contrast

Dioptre adjustment to ensure both eyes are correctly focused
