

Swarovski NL Pure 10x52

The NL Pure 10x52 are professional binoculars for demanding observation situations, particularly in difficult light conditions. With 10x magnification, they help you identify critical details while their field of view of 130 meters (142 yds) keeps everything in sight. This makes them particularly good for surveying open landscapes. The characteristic NL Pure wasp waist ensures the NL Pure 10x52 binoculars sit ergonomically in your hand. Maximum color fidelity and uncompromising image definition all the way to the edges are guaranteed by the proven SWAROVISION technology.

Description

With 10x magnification and a 52 mm objective lens diameter, the NL Pure 10x52 binoculars are perfect for demanding users who rely on excellent performance in difficult light conditions.

The NL Pure 10x52 binoculars are ideal:

for surveying open spaces

For observations at dawn and dusk

Ideal mix of good detail recognition and large field of view

Overview of the NL Pure 10x52:

Good detail recognition with 10x magnification

Binoculars: Swarovski NL Pure 10x52

Exceptional twilight performance thanks to a 52 mm objective lens diameter

Large field of view of 130 m/1,000 m (142 yds/1,094 yds)

Comfortable handling thanks to the NL Pure wasp waist

SWAROVISION technology

Tip for long observation sessions: the FRP forehead rest, available separately, ensures comfort and stability. The TAs tripod adapter allows you to attach your NL Pure binoculars to a SWAROVSKI OPTIK tripod – for hours of steady observation.

Uncompromising high performance thanks to SWAROVISION technology

The pioneering SWAROVISION technology with field flattener lenses offsets the curvature of the field of view to provide exceptional edge sharpness. This means the complete image stays sharp from the middle of the field of view all the way to the edges. There is no need to refocus if your eye moves in the image, you can immediately see every detail in absolute clarity. The special coating on the lenses in combination with the inert gas filling ensures color fidelity.

The NL Pure series

The letters NL in “NL Pure” say it all. They stand for: Nature Lovers. The binoculars in the NL Pure family offer maximum optical quality in its purest form. They are characterized by their huge field of view extending all the way to the edges. Thanks to the wasp waist, each set of NL Pure binoculars sits comfortably in your hand, making them trusted companions even over extended periods of use. The amazing quality provided by SWAROVISION and the field flattener lenses guarantees precise and razor-sharp images with no distortion.
