

Swarovski NL Pure 14x52

The NL Pure 14x52 binoculars offer breathtaking observations when every detail counts. In difficult light conditions, the NL Pure 52 binoculars reveal their full strength. A 52 mm objective lens diameter captures an exceptional amount of light. The huge 14x magnification means you don't miss a single detail, even at distances of over 1,000 meters (1,094 yards). The NL Pure's ergonomic wasp waist makes these professional binoculars comfortable to handle while the SWAROVISION technology guarantees absolute edge sharpness and color fidelity.

Description

Product description

Binoculars: Swarovski NL Pure 14x52

Thanks to their 14x magnification and a 52 mm objective lens diameter, the NL Pure 14x52 are excellent professional binoculars for observations at long distances and in difficult light conditions.

The NL Pure 14x52 binoculars are ideal:

For birding in particularly challenging conditions

To identify all details even at long distances

For observations at dawn and dusk

To precisely identify different wildlife species and their characteristics

Overview of the NL Pure 14x52:

Huge 14x magnification, ideal for professional birdwatching

Strong twilight performance thanks to a 52 mm objective lens diameter

Good field of view of 93 m/1,000 m (102 yds/1,094 yds)

Comfortable handling thanks to the NL Pure wasp waist

SWAROVISION technology

Tip for long observation sessions: the FRP forehead rest, available separately, ensures comfort and stability. The TAs tripod adapter allows you to attach your NL Pure binoculars to a SWAROVSKI OPTIK tripod – for hours of steady observation.

Uncompromising high performance thanks to SWAROVISION technology

The pioneering SWAROVISION technology with field flattener lenses offsets the curvature of the field of view to provide exceptional edge sharpness. This means the complete image stays sharp from the middle of the field of view all the way to the edges. There is no need to refocus if your eye moves in the image, you can immediately see every detail in absolute clarity. The special coating on the lenses in combination with the inert gas filling ensures color fidelity.

The NL Pure series

The letters NL in “NL Pure” say it all. They stand for: Nature Lovers. The binoculars in the NL Pure family offer maximum optical quality in its purest form. They are characterized by their huge field of view extending all the way to the edges. Thanks to the wasp waist, each set of NL Pure binoculars sits comfortably in your hand, making them trusted companions even over extended periods of use. The amazing quality provided by SWAROVISION and the field flattener lenses guarantees precise and razor-sharp images with no distortion.
