Description

Experience the world like never before with the APC 60 ED, the world's first handheld stabilized spotting scope. Enjoy rock-steady views with up to 35x magnification, all without the need for a tripod.

Designed for unmatched clarity and effortless mobility, the APC 60 lets you explore nature with extraordinary precision and freedom.

Precision, Hand-Held

Experience the world like never before with the APC 60 ED, the world's first handheld stabilized spotting scope. Enjoy rock-steady views with up to 35x magnification, all without the need for a tripod.

Designed for unmatched clarity and effortless mobility, the APC 60 lets you explore nature with extraordinary precision and freedom.

Modular Flexibility

The APC 60 ED and KSP 80 HD are designed with a shared vision of versatility. Both models use the same interchangeable eyepiece, allowing you to effortlessly switch between them.

Already own a KSP 80 HD with an eyepiece and looking for a lightweight, stabilized companion for your travels? Simply purchase the APC 60 ED body only—no need to invest in an additional eyepiece.

Of course, the flexibility works both ways: if you start with the APC 60 ED, you can easily expand to the KSP 80 HD by using the same eyepiece.

Spotting Scopes: Kite Optics APC 60ED Stabilized Scope

This modular design gives you the freedom to adapt your gear to any adventure, without unnecessary extra costs.

Power in Your Hands

Featuring 17–35x magnification and premium ED optics, the APC 60 delivers breathtaking wide-angle views with exceptional clarity. Its oversized focus and power wheels ensure smooth, intuitive control—all packed into a sleek, lightweight design of just 1100g.

“1 charge = months of adventure.” 30 hours of viewing per charge, built to keep up with your passion for nature.”
