Description

MAKE THE LEAP TO FULL FRAME

Give your creativity a full-frame upgrade. Better bokeh, wider angles of view and image quality that will blow you away – even in low light.

Full-frame video too

The full-frame advantage also extends to video for spectacular cinematic results.

Intelligent autofocus

Stills or video: keep subjects in sharp focus as they move around the frame.

The full-frame advantage

Enjoy wider dynamic range, reduced digital noise and crystal-clear detail – that's the EOS R8's full-frame advantage.

Shoot shallower

Perfect for powerful portraits. With a larger sensor comes shallower depth of field and more dynamic range. Make your subject stand out against a smooth, out-of-focus background with beautiful bokeh. Capture more details in highlights and shadows.

BIG ON FEATURES SMALL IN SIZE

The EOS R8 is our lightest full-frame, mirrorless camera yet, weighing in at just 461g.4

Enjoy the full-frame advantage everywhere you shoot, from decisive moments on the streets to remote landscapes and adventures.

24.2 megapixel full-frame sensor

An ideal balance of detail, speed and low-light performance, whether you're shooting photos or video.

GAME-CHANGING AUTOFOCUS

Inside the EOS R8 is our renowned Dual Pixel CMOS AF II focusing system. It recognises and tracks different subjects and is accurate even in very low light – down to -6.5EV.¹

Intelligent AF that knows what you're shooting

The EOS R8 has been programmed using a state-of-the-art machine-learning algorithm that lets it track moving subjects as they move about the frame.
