Fujifilm X-E5 + 23mm f2.8

The Refined Classic A modern classic can’t simply mimic what has gone before. Nor can it ignore what has preceded it. It should respect its lineage, by refining a concept without losing its essence. FUJIFILM X-E5 embodies what it means to be a modern classic, combining a sophisticated, elegant design with analogue controls that inspire image making.

Description

Design
Crafted solely from machined aluminium, the top-plate retains the essence of a classic camera with its angular design.
This stunning look comes together with tactile handling to create a camera that’s a joy to use.

Machined Aluminium Top-Plate
The top-plate is carved from a single piece of metal, not only enhancing the look and feel of the FUJIFILM X-E5, but also improving the dial operation. Additionally, an anodised finish gives the body a refined, high-quality aesthetic.

New Film Simulation Dial
The newly designed Film Simulation dial features a precision-cut indicator window that minimises the gap between dial and body for an exact finish. Additionally, you can individually set Film Simulation and image quality settings to the FS1-FS3 positions, allowing you to save your own FS recipes.

Mastering the Details
Refinement is central to every aspect of the FUJIFILM X-E5's design. The viewfinder and diopter adjustment control, for example, fit flush with the body, while the Bluetooth button on the base plate evokes the look of the rewind button on classic film camera.

The Joy of Photography
FUJIFILM X-E5 doesn't just look good.
It also offers a stunning viewfinder and beautiful analogue controls.
This is a camera designed to bring joy to your image making.

New Classic Display Mode
The new Classic Display mode* provides a clean viewfinder image with key information at the bottom of the frame. Combined with a body style that allows you to operate the dials and the lever with one hand, you can immerse yourself in image making with the camera to your eye.

Surround View Mode
FUJIFILM X-E5's Front Control Lever accesses the Surround View function, which displays a semi-transparent or outlined area outside the image. This provides an OVF-like experience, enabling you to see outside the EVF frame so you can easily monitor what's about to come into frame.

Evolved Mobility
Despite being similar in size to its predecessor, X-E5 is the first in the camera series that features a powerful five-axis IBIS mechanism offering up to 7.0 stops in the centre and 6.0 stops at the periphery*. This makes it an effortless, "daily carry," that remains adaptable to the most challenging scenarios.

*Based on CIPA 2024 standards. Yaw/pitch/roll correction performance when equipped with FUJINON XF35mmF1.4 R lens (sold separately)

See More, Tell More
A sophisticated design.
Intuitive controls that keep you immersed in image making.
A compact size that fits perfectly in your hand.
