

Vosker VKX Wireless Camera

Enhance Your Surveillance Capabilities The Vosker VKX 4G LTE wireless security camera has been designed to offer significantly longer battery life (up to 6 months) through an integrated solar panel that is twice the size of any found on previous devices in the Vosker range. Greater control can be achieved through the instant video access with On-Demand Mode and better autonomy is offered via an intuitive new front access design. To receive photos and videos from your Vosker camera to a smartphone/tablet connected to the Vosker app, you will need to purchase a transmission plan.

Description

Crystal-Clear Surveillance

Perfect for a wide range of applications, including surveillance and monitoring of commercial and personal properties, and ideal as a preventative measure when it comes to common nuisances such as fly-tipping and antisocial behaviour, the Vosker VKX 4G LTE wireless security camera uses a pre-activated SIM card to connect to all major networks in most countries*, transmitting crystal-clear images and videos to your phone the instant its motion sensor is triggered. The images are presented in full colour by day and in black and white after dark, ensuring you are always in-the-know when it comes to activity in your observed location.

Instant Observation

On-demand mode provides instant access to video footage, so you can see what is happening on your land in real-time, without having to wait

for the device to be triggered. Use on-demand mode to request a 15-second video clip through the Vosker app.

Snooze Detections

A new feature introduced in the VKX is the ability to snooze the camera's detection capabilities for a preset duration. Perfect for a moment of privacy, or for longer periods if you think surveillance is not necessary. Pausing the camera's detection capabilities can be discreetly carried out using the Vosker app.

Extended Battery Life

The VKX features a built-in solar panel which is 2x larger than the solar panels found on previous models in the Vosker range. This solar panel harnesses the power of the sun, charging the VKX's removeable V-LIT-B3 battery and providing up to 6 months of reliable observation. This solar panel features a frameless design, significantly enhancing its performance by reducing the likelihood of snow or dust accumulating and blocking the panel over time.

Intuitive New Design

A new and intuitive front-access design allows for greater autonomy and easier access to your wireless camera. Batteries can be swapped easily, without the need for dismounting the camera from its mounting arm, meaning you can carry out any maintenance easier and quicker than ever.

A new, more robust antenna design makes the VKX more ideal for tough conditions, withstanding harsh weather and ensuring your observed properties are always covered come rain or shine. But it's not just designed to withstand the elements, this new antenna achieves enhanced signal receptivity, ensuring a better connection and therefore more seamless communication between the camera and the Vosker app.

The new deterrent light on the VKX has been strategically positioned to signal the camera's presence whilst warding off any potential burglars or animals that come within range of the wireless camera.

Built-in AI Technologies

The Vosker VKX features Vosker SENSE AI image recognition technology which accurately differentiates between human disturbances and instances where wildlife wanders past the field of view, reducing the number of notifications the user will receive and ensuring unwanted alerts are kept to an absolute minimum.

Vosker Plans

With a pre-activated SIM card included with your purchase, the Vosker VKX is ready to keep you covered 24/7, even in areas with very little cellular reception, so there is no need to purchase a SIM card from a third-party provider. Vosker offers a range of data plans, with varying video and still image allowances to choose from, so you can find the perfect plan for your application. And what's more, there's no strings attached — choose from monthly or yearly plans. There's even a 7-day free trial included, so you can decide which plan works best for you. Network	4G LTE Cellular Connectivity
SIM Card	Pre-installed & activated SIM card included
Data Plan	Data plan required for operation. 7-day free trial offered.
GPS Tracker	No
Mobile App Features	On-demand mode (photo & video)
	Snooze detections
	Deterrent Light
	Smart notifications
	Vosker SENSE AI technology
	Motion activated video recording (15 second clips)
Video	1080p Full HD (30 fps)
Video Resolution	Yes
Audio Recording	1920×1080
Photo Resolution	600×338
Preview Thumbnail Resolution	Timelapse
Capture Modes	90
FOV	Colour by day, black and white (infrared) by night
Image Capture Modes	Date & time stamp
Data Stamped on Images	32 GB
Storage	54 hours (15 second clips) or 75,000 photos
Recording Capacity	Up to 30 m (100 ft)
Detection Range	30 m (up to 100 ft)
Night Vision Range	Frameless solar panel
Power	

Trail Cameras: Vosker VKX Wireless Camera

Mounts	Removeable battery pack (14,000 mAh)
Dimensions	USB-C (optional wired power supply)
	Standard 1/4"-20 tripod mounts (2x)
	(Camera): 4.5" W X 4.6" H X 6" D (114mm W X 117mm H X 153mm D)
	(Packaging): 6.3" W X 6.9" H X 7.8" D (160mm W X 175mm H X 200mm D)
Weight	21 oz. (0.6 kg) (w/ battery)
Environmental Protection	IP65 weather-resistant
Operating Temperature	-20 to +50°C
