Description

The possibility to wrap your entire hand around one of the barrels while keeping your index finger on the focus wheel, gives you a unique comfort and allows viewing and operating of the instrument with one hand only. The binocular barrels are slim, but still feature a sufficiently thick rubber armor with texture to provide you maximum grip. The metal twist-up eyecups are removable, allowing the user to easily clean them or replace them by new ones if necessary. The ED/HD optical system provides a brilliant and sharp image from centre to edge. The color tone is perfectly natural for accurate determination.

Lightweight ergonomic open hinge design
Textured rubber for optimal grip
sharp from centre to edge
ED/HD optical system
KITE PERMAVISION
4 stage removable aluminum twist-up eyecups
KITE MHR Advance + coating
Fully waterproof and nitrogen filled
30y warranty
including lens covers, straps and pouch
