Description

Size says it all? This scope may be small, but it packs a big punch. It benefits all mechanical features of the larger SP scopes, but houses a smaller optical system. The SP 65 has just the right size for you to take it anywhere you want, while still being able to make good observations and accurate determinations also in lower light conditions. The 17-50x eyepiece offers a high magnification and a wide field of view. This may be one of the very best entry level fieldscopes ever made.

- compact scope
- robust aluminum construction
- fully rubber armored
- dual speed focus wheel
- 17-50x eyepiece
- KITE MHR coating
- direct 200PL14 manfrotto tripod foot
- can be equipped with excellent stay on case
- 4 stage eyecup
