Description

SP 82 ED, Top of the range and equiped with an ED lens. The ED lens, also known as fluorite or HD lens, allows serious reduction of color defects as chromatic abberration. The image is perfectly natural and observations or photos made through phonescoping and digiscoping clearly suffer less from color fringes. This scope is available with a 20-60x zoom eyepiece, as well as the innovative 25-50x wide angle zoom eyepiece which is reserved to premium scopes only.

Robust aluminum construction compact sized performance ED lens system KITE MHR Advanced coatings dual speed focus wheel briliant color reproduction 25-50x or 20-60x eyepiece direct 200PL14 manfrotto tripod foot can be equiped with excellent stay on case
