

Fujinon XF 23mm f2.0 R WR

The metal exterior, modeled after the design of XF35mmF2 R WR, gives a sense of premium quality and robustness. The compact and stylish form factor almost completely eliminates mechanical vignetting* when using the optical viewfinder on the FUJIFILM X-Pro2 and X-Pro1 cameras. The aperture ring and focus ring have just the right amount of clicking and torque for great operability.

Description

Our price £429.00

The XF23mmF2 R WR is a wide-angle lens with advanced image resolution, capable of drawing out the full performance of Fujifilm's proprietary X-Trans CMOS sensor. It has a similar size and design flair of the existing XF35mmF2, to make up a stylish collection of compact F2 lenses. The inner-focus AF system uses a stepping motor* to drive the focusing group of lens elements for silent and fast autofocus. The metal exterior gives a sense of premium quality and robustness, and the aperture ring and focus ring have been designed for optimum operability. The lens is also weather and dust resistant and operates at temperatures as low as -10°C, making it an ideal choice for outdoor photography.
