Description

Our price £389.00

The "FUJINON XF35mmF2 R WR" offers a focal length equivalent to 53mm* with the angle of view similar to that of the human eye and a maximum aperture of F2.0. It delivers sharp images with rich bokeh. The optical construction of 9 elements in 6 groups (including two aspherical elements) achieves the perfect balance of high image quality and compact size. The lens features the smallest diameter of the line-up and thanks to the inner focus system and stepping motor, it achieves an autofocus time of just 0.08 sec**.
The exterior of the lens is weather and dust-resistant and can work in temperatures as low as -10°C.
The lens is ideal for any scene and application. This is the new standard for all photography fans.
