Description

£879.00

The lens has a fixed focal length of 16mm (24mm in 35mm format equivalent) and offers a dramatic wide field of view and stunning optical performance. The F1.4 maximum aperture delivers high image quality in low-light conditions and bokeh-rich macro photography with the minimum working distance of 15cm. The lens has a fixed focal length of 16mm (24mm in 35mm format equivalent) and offers a dramatic wide field of view and stunning optical performance. The F1.4 maximum aperture delivers high image quality in low-light conditions and bokeh-rich macro photography with the minimum working distance of 15cm. Featuring high-speed autofocus, a weather- and dust-resistant structure that can work in temperatures as low as -10°C, and great portability thanks to its compact size, the shooting possibilities are further expanded.
