Description

This full-frame, wide-angle prime for mirrorless cameras is ideal for a wide range of photo and video applications, including night sky photography, landscapes, interiors, weddings and architecture. Its ultra-wide aperture of F1.4 ensures very fast shutter speeds in lower-light conditions, as well as a very shallow depth-of-field for pronounced subject separation.

The lens comes with a raft of pro-level features that includes an aperture ring with de-click and lock switches, an AFL button, a lockable lens hood, a rear filter holder and a manual focus lock feature. The optical design includes two FLD, one SLD and four aspherical elements that ensure very minimal chromatic aberration, sagittal coma flare and image distortion. The resulting images are highly-detailed with exceptional sharpness and accuracy from the centre to the periphery of the frame.

Angle of View Wide Angle
Camera type Mirrorless
Lens Mount L-Mount, Sony E-mount
Sensor Size Full Frame
Construction 17 elements in 14 groups
Angle of view 84.1°
Number of diaphragm blades 11 (rounded diaphragm)

Minimum aperture F16
Minimum focusing distance 25cm / 9.9in.
Maximum magnification ratio 1:7.1
Filter size ?72mm
Dimensions (diameter x length)
L-Mount??75.7mm × 95.5mm / ?3.0in. × 3.8in.

Sony E-mount??75.7mm × 97.5mm / ?3.0in. × 3.8in.

Weight
L-Mount?520g / 18.3oz.

Sony E-mount?510g / 18.0oz.
