Description
In 2019, Sigma released the 35mm F1.2 DG DN | Art, the world's first 35mm mirrorless camera lens with an F1.2 aperture. Six years later, Sigma is proud to introduce its successor, the 35mm F1.2 DG II | Art.

Designed and engineered with Sigma's latest technology, the 35mm F1.2 DG II | Art offers not only improved optical performance, but also greatly enhanced portability thanks to a significant size reduction of approximately 30%. With its improved design, the lens delivers unparalleled rendering power, high-resolution clarity and large, beautiful bokeh in a more portable form. Focus breathing is also effectively minimized, ensuring outstanding results not only in still photography, but also when shooting video.

The Sigma 35mm F1.2 DG II | Art is an exceptional, uncompromising lens that achieves the perfect balance of optical performance, brightness, compact size, light weight and ease of use.

Angle of View Standard

Camera type Mirrorless

Lens Mount L-Mount, Sony E-mount

Sensor Size Full Frame

Construction 17 elements in 13 groups (1 SLD and 4 aspherical lens elements)

Angle of view 63.4°

Number of diaphragm blades 11 (rounded diaphragm)

Minimum aperture F16

Minimum focusing distance 28cm / 11.1in.

Maximum magnification ratio 1:5.3

Filter size ?72mm

Dimensions (diameter x length)

L-Mount: ?81.0mm x 111.4mm / ?3.2in. x 4.4in.

Sony E-mount: ?81.0mm x 113.4mm / ?3.2in. x 4.5in.

*The length of a lens is measured from the front of the lens to its mount

Weight

L-Mount: 755g / 26.6oz.

Sony E-mount: 745g / 26.3oz.
