Description

From £165.23

With Firecrest Ultra we have taken this process one step further and we now "lap and polish" the filters, a process previously only carried out on our cinema grade filters. So as well as the superb neutrality and durability that Firecrest deliver, the filters now benefit from enhanced clarity and sharpness and are the most optically flat photographic ND filters in the world, regardless of focal length.

Firecrest Ultra are available in 100x100mm and various circular sizes and in a range of popular densities from 1 to 10 stops. 13 and 16 stops and now 18 to 24 stops.

For the discerning photographer Firecrest Ultra aren't the best choice.

They're the ONLY choice.
