

Rode Wireless GO II Dual Wireless Microphone

Wireless GO II Dual Channel Wireless Microphone System The world's smallest and first truly wireless microphone has been reborn. The Wireless GO II is an ultra-compact and extremely versatile wireless microphone system consisting of a dual channel receiver and two transmitters. Incorporating the same unique form factor and professional sound quality as the original Wireless GO with groundbreaking, patent-pending technology, the Wireless GO II is the perfect microphone for a wide range of content creation applications. The Wireless GO II boasts a range of powerful features, including universal compatibility with cameras, mobile devices and computers, extended range (200m line of sight) and improved transmission stability, on-board recording capabilities, and much more. This is next generation wireless audio.
