Description

Capture outstanding high bitrate AVCHD 1080p video with variable frame rates in any light thanks to an extensive range of professional features and manual controls. These include a high sensitivity 1/2.84 type CMOS PRO sensor, a large 8-bladed aperture, Wide DR and Highlight Priority modes and powerful optical image stabilisation.

The LEGRIA HF G40 offers great versatility in a compact handheld design. Capture broad landscapes and detailed close ups with the bright 20 x wide angle f/1.8 zoom lens and simultaneously record in both AVCHD and MP4 format. A high resolution, tilting viewfinder allows use in tight spaces and from many awkward angles.

Wi-Fi allows remote shooting via your smart device with control of shutter speed, focus and exposure. A wide range of advanced connections include mic and headphone sockets, direct HDMI and AV out, a Mini Advanced Shoe and tripod mount, USB and dual SD card slots. Geo-tagging is also available via optional accessory.
