Description

Go Big With Mini

Mini 5 Pro features an ultra-light, palm-sized foldable design that slips easily into a backpack or pocket. It is C0-certified, enabling hassle-free flights across most EU member states. With 42GB of internal storage, footage can be saved directly, ensuring uninterrupted flight enjoyment.

Images at Their Best

Mini 5 Pro integrates a 1-inch CMOS sensor, supporting 4K/60fps HDR video recording with up to 14 stops of dynamic range for cinematic visuals. This large sensor, enhanced by the new image-processing technology and intelligent algorithms, preserves even minute details in low-light conditions such as sunsets and nightscapes, delivering shots that are simply, effortlessly breathtaking. With the 48mm Med-Tele mode, subjects stand out more prominently in the frame, while portrait optimization algorithms [6] capture every expression with remarkable clarity.

225° Gimbal Rotation for Dynamic Camera Movement

With 225° roll rotation, the gimbal enables flexible and dynamic camera movement. Paired with intelligent modes like QuickShot Rotate,

Timelapse, Spotlight, and Waypoint Flight, capturing creative rotating footage is now easy.

True Vertical Shooting for Instant Sharing

Excellent for skyscrapers, waterfalls, and vibrant city scenes, instantly shoot vertical videos and photos and share. No cropping needed. Every photo and video is ready for social media, filling the screen with vibrant, full-frame brilliance.

Confident Flight With Nightscape Omnidirectional Obstacle Sensing

Mini 5 Pro features a forward-facing LiDAR and multiple vision sensors for nightscape omnidirectional obstacle sensing, making return-to-home safer. In city nightscapes, it actively detects and avoids obstacles along flight and return paths for worry-free night flying. With sufficient light, it can memorize flight routes, enabling safe takeoff and return even without satellite signal.

Upgraded ActiveTrack 360°

Mini 5 Pro captures every highlight, wherever you are. The upgraded ActiveTrack 360° offers customizable tracking in various scenarios, and features more stable and safer tracking performance.
